Blochin. Blochs. Acta 1158:339-34(1993).
-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND LOW AFFINITY CALCIUM-BINDING SITES.
-!- SUBCULIUAR LOCATION ENDOPLASMIC RETICULUM LUMEN.
-!- SUBCLIULAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
-!- CAUTION: WAS ORIGINALLY (RRE. 2) THOUGHT TO BE D-BETA-
HYDROXYBUTYRATE DEHYDROGENASE.

CLIN. INVEST. 86:332-335(1990).
-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND LOW APFINITY CALCIUM-BINDING SITES.
-!- SUBBELLULAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
                                                                                                                                                                                                                                                                                        Nucleotide sequence of a Drosophila melanogaster gene encoding calreticulin homologue.";

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

s29129
calreticulin precursor (clone 3) - African clawed frog (fragment)
C; Species: Xenopus laevis (African clawed frog)
C; Date: 30-Sep-1993 #sequence_revision 30-Sep-1993 #text_change 13-Aug-1999
C; Accession: 529129
R; Treves, S; Zorzato, F; Pozzan, T.
Biochem. J. 287, 579-581, 1992
A; Title: Identification of calreticulin isoforms in the central nervous system. A; Reference number: S29129; MUID:93074997
A; Accession: 329129
A; Molecule type: mRNA
A; Residues: 1-411 - TRRE>
A; Cross - references: EMBL:X67597; NID:964608; PIDN:CAA47866.1; PID:964609
C; Superfamily: calreticulin
C; Keywords: 91vcoprotein
F; 1-12/Domain: signal sequence (fragment) #status predicted <SIG>F; 1-12/Domain: signal sequence (fragment) #status predicted <AMT>F; 408-411/Region: endoplasmic reticulum retention signal
F; 339/Binding site: carbohydrate (Asn) (covalent) #status predicted

-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND LOW APFINITY CALCIUM-BINDING SITES.
-!- SUBCELLULAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö

-!- FUNCTION: THIS PROTEIN BINDS CALCIUM. THERE ARE BOTH HIGH AND
LOW AFFINITY CALCIUM-BINDING SITES.
-!- SUBCELLULAR LOCATION: ENDOPLASMIC RETICULUM LUMEN.
-!- SIMILARITY: BELONGS TO THE CALRETICULIN FAMILY.
                                          [2]
